TRUEL Lucas

Front-end developer

ABOUT ME

Front-End Developer with a focus on Angular and TypeScript ecosystems. I enjoy building interactive web applications and robust user interfaces through clean, efficient code. Working in Agile teams across telecom and consulting sectors has sharpened my ability to translate business needs into technical solutions. I'm passionate about staying current with front-end technologies while delivering projects that make a difference for users.

SKILL

Front-End Development: Proficient in Angular, TypeScript, JavaScript with basic knowledge of React. Experienced in using UI frameworks such as Material Design, PrimeNg, and Tailwind for responsive and visually appealing designs.

State Management & Data Handling: Skilled in NgRx for state management and RxJs for reactive programming. Familiar with data visualisation using Ngx charts.

Development Tools & Collaboration: Experienced in using Git (GitHub), Postman, Figma, Jira, Target Process, and Azure DevOps for version control, API testing, project management, and team collaboration.

Accessibility & Documentation: Familiar with WCAG accessibility standards implementation. Experience in conducting user testing and creating technical documentation for components and features.

Methodologies: Familiar with Agile and Scrum methodologies.

Cloud Platforms: Basic knowledge and usage of applications on cloud platforms like AWS and Firebase (Authentication, Firestore, Realtime Database).

Responsive Design & APIs: Expertise in crafting mobile-first, responsive designs and developing REST APIs for seamless backend-frontend integration.

EXPERIENCE

Proximus — *Front End Developer / Integrator Web (3 Years/ 2021-PRESENT)*

Stack : Magnolia, Angular, SCSS, TypeScript, NgRx, RxJs

Methodology : Agile

Project Overview: Contributed to the digital sales team for online sales platforms of Proximus, focusing on package offerings. Managed the display and promotion of telecom product packages and special offers, enhancing the customer purchase journey through intuitive interfaces and optimized user experiences.

- **Developments:** Maintained and updated various sales applications and product pages, implementing new features, fixing bugs, and optimizing performance to improve load times and user experience. Collaborated with back-end teams to integrate APIs for displaying product data and pricing. Implemented WCAG accessibility standards to ensure platform compliance and inclusive user experiences.
- **Integrations:** Integrated design mockups using HTML/CSS within the Magnolia CMS environment. Created and managed reusable components to display promotions dynamically and special offers across different platforms. Ensured responsive design and cross-browser compatibility for all implemented solutions.
- **Organisation:** Collaborated closely with design teams to transform mockups into functional interfaces. Participated in agile daily meetings and sprint planning sessions. Coordinated with offshore development teams in India and Greece to ensure development consistency. Communicated regularly with marketing and product teams to understand business needs and propose suitable technical solutions. Contributed to user testing and technical documentation efforts.

Ama European Consulting — *Front End Developer (1 Year/ 2020-2021)*

Stack : Angular, SCSS, TypeScript, Node.js

Methodology : Agile

Project Overview: Contributed to the development of a CRM system for consultant profiles management, designed to facilitate consultant placement and recruitment processes,

utilising Angular, SCSS, TypeScript, and Node.js in an Agile environment.

- **Developments:** Participated in implementing data filtering and sorting functionality in the backend using Node.js, and contributed to developing responsive interfaces to display candidate profiles according to design specifications. Collaborated on the creation of dashboard components for consultants management and tracking.
- **Organisation:** Worked within a small, collaborative team of 3 developers and 1 designer, facilitating efficient communication and rapid development cycles. Participated in regular code reviews and design sessions to ensure consistent implementation and quality across the platform.

Ama Associates — *Front End Developer (1 Year / 2019-2020)*

Stack : React, Node.js

Methodology : Agile

Project Overview: Contributed to the development of the company's presentation website with enhanced functionalities, showcasing services and expertise to potential clients using React and various interactive components.

- **Developments:** Implemented basic React components and functionalities to create an engaging user experience. Developed responsive layouts to ensure optimal display across all devices and browsers. Created interactive elements to improve visitor engagement with company information.
- **Organisation:** Collaborated in a small team consisting of two developers and one designer, ensuring efficient workflow and consistent implementation of design specifications. Participated in regular review sessions to maintain quality standards throughout the development process.

CLOSING THOUGHTS

Looking ahead, I'm excited to take on new challenges where I can apply my front-end expertise while continuing to grow as a developer. I thrive in collaborative environments where I can contribute my Angular and TypeScript skills. My experience working with diverse teams has taught me the value of clear communication and adaptability - qualities I bring to

every project I tackle.
